- Ideal for both corporate and commercial environments

- A wide selection of software tools

- An easy-to-use system for current and future workflows

Fits the way you want it

Océ TDS700
Productive, flexible wide format system

In today's technical environments a wide format system has to please everyone. Business people want value for money and peace of mind. That means a flexible, reliable system that saves time and costs. Users want simplicity and reliability. In other words, an easy-to-use machine that fits current workflows.

The Océ TDS700 meets all these requirements. With a robust, configurable printer, the powerful Océ Power Logic® Controller, a choice of two scanners and a wide range of software, it fits the way you work both now and in the future.

Productive, flexible wide format system

The logical choice for your organisation

Océ TDS700 is the perfect fit no matter what your wide format requirements are:

- True print productivity independent of media size changes within the print job (4.7 Ao/min; 9.1 D/min)
- Concurrent printing and scanning
- Instant-on. No waiting around for the system to warm up
- 600 × 1200 dpi pico printing for sharper details and smooth grey scales.
- A choice of two scanners, a folder and different media size configurations
- Unmatched ease of use, iF communication design award 2006
- Océ Print Exec® Basic offers web-based job submission
- Lowest energy consumption in its class.
- Océ robust design, reliable by nature

## Ideal for both corporate and commercial environments

The Océ TDS700 fits the way you want it whether wide format documents support your business or generate your income.
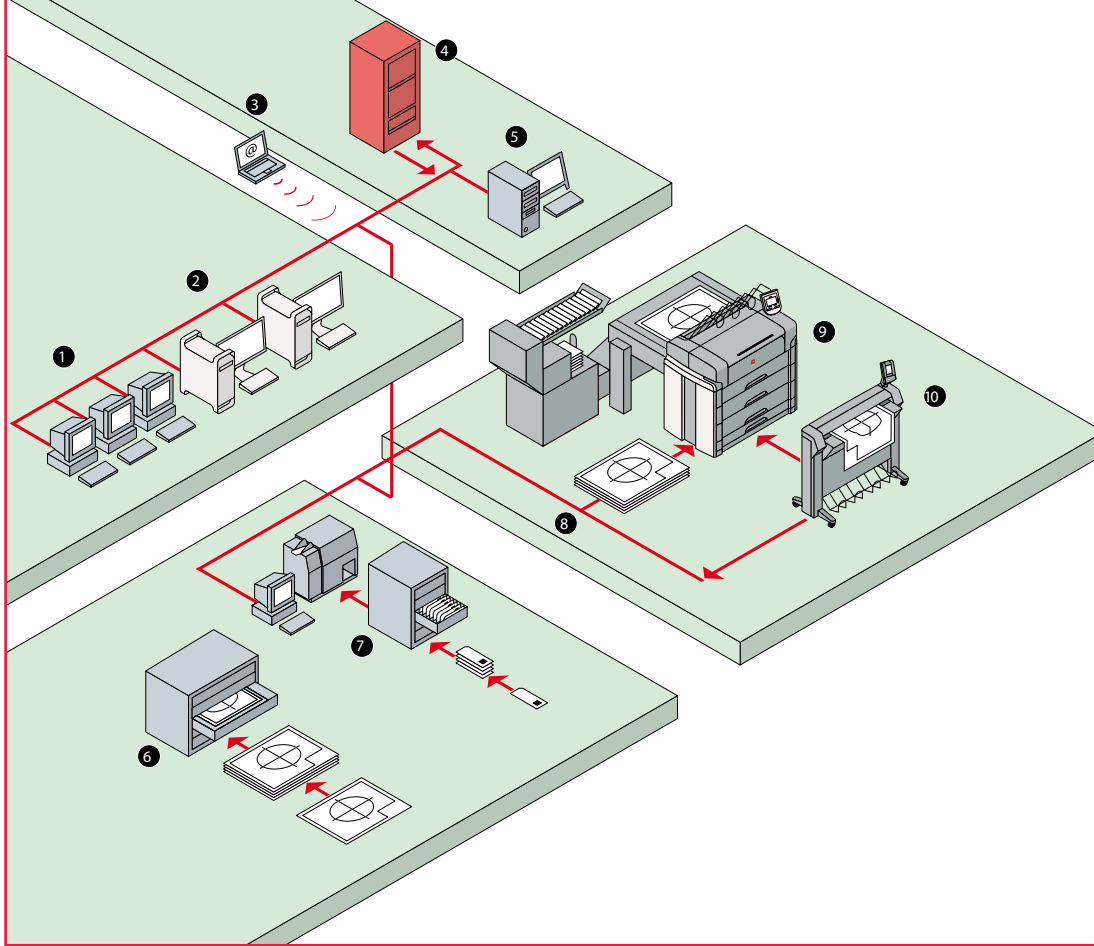

In CAD/Engineering environments:

- Up to six rolls and sheet feeders to give you all the media flexibility you need
- System can be installed close to users for quick and easy access because of the low noise, reduced ozone discharge and negligible heat emission
- Fastest time from cold start to print in the industry
- Silent printing means productive employees

In Reprographic environments:

- High quality output through 600 × 1200 dpi pico printing
- Print over 1200 m2 without having to reload media
- Right the first time with Océ Image Logic® pushes your productivity to the edge
- System's ease of use makes it productive from the moment it's installed

A wide selection of software tools

Thanks to a full range of software, you can configure the Océ TDS700 to the way you want to work.

Océ Account Center allocates printing, copying and scanning costs to the appropriate departments or customers. As a result, it turns expenditure into chargeable income and maximises returns on document assets.

Océ Repro Desk is end-to-end print automation software that takes your business to the next level. By streamlining your workflow it allows you to increase your profitability through new services, faster turnaround times and improved efficiency.

Océ Print Exec® Software Suite is a powerful tool that optimises your entire technical document printing process. From job submission in a wide range of formats, through to output and management finished documents.

An easy-to-use system for current and future workflows

- Print with Océ driver or Océ Print Exec® Suite
- Single copies or productive set copying with Océ Matrix Logic®
- Scan to archive with Océ Scan Logic®
- Autozoom

Engineering Department prints with

1 Windows printer driver
2 Adobe® PostScript 3 printer driver
3 Web enabled job submission

IT Department

4 Distributes new drivers via server
5 Remotely controls the printer settings

Archive Department

6 Copies large format drawings
7 Digitises microfilm/analogue drawings
8 Archives digital drawings

Print Facility

9 To serve all print copy scan needs concurrently
10 Easy to use system

Océ TDS700 Productive, flexible wide format system

Owner/Executive **1**

*'I want a printer that keeps everyone happy'*

IT administration **2**

'I want a printer that fits our IT set-up'

Facilities **3**

'I want a printer I can install and forget about'

Purchasing **4**

'I want a printer that's the best deal'

Fits the way you want it

Network administration

'I want a printer that's predictable'

The Océ TDS700 gives network administrators full control over the system's operation from their workplace:

- Océ TDS700 Power Logic® Controller Remote provides full access to all system settings
- All administrator settings are password protected
- Advanced security settings prevent unwanted access
- A full range of software is available, from an entry level package to a fully loaded configuration
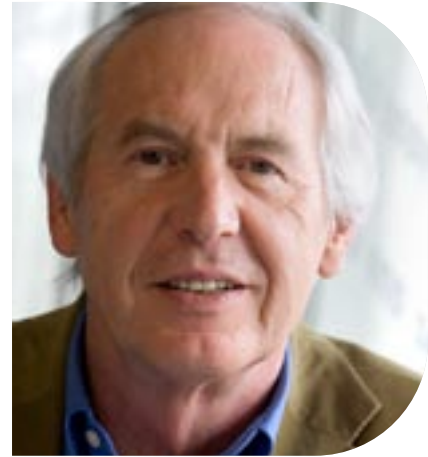

CAD

'I want a printer that's ready when I need it'

The Océ TDS700 makes life easy for CAD managers because it outputs documents fast and on time:

- When a job is ready for printing, the system reacts instantly
- Océ Advanced Queue Management gives users prints when they need them
- Easy-to-use templates mean copies and scans are right first time
- Users can submit prints using certified printer drivers or with the web enabled Océ Print Exec® Basic

CRD

'I want a printer that's easy to use'

With the Océ TDS700, central repro managers can offer a high level of service to internal customers:

- Schedule and reorganise jobs with Océ Advanced Queue Management
- Océ Image Logic® ensures right-first-time copying and scanning
- Different access levels are password protected
- Smart user interface guides people through the system
- User-specific settings can be saved for easy access later
- System can be expanded with up to six rolls, a sheet feeder and an inline folder
- Scanner is ready for future services like colour scan to archive

Beyond the Ordinary

Printing for Professionals

Building a sustainable business has always been one of our core business principles. We do this by developing products and services that add value to the document processes of our customers, while minimizing environmental impact. And we conduct our business activities in a socially responsible manner aimed at preventing health, safety and environmental risks.

Océ helps the people who make our world. Companies everywhere use Océ technical documentation systems in manufacturing, architecture, engineering and construction. Each week, high speed Océ printing systems produce millions of transaction documents such as bank statements and utility bills. And in offices around the world, people use Océ professional document systems to keep the wheels of business and government turning. Océ is also at work in publishing on demand, newspaper production, document management outsourcing and wide format colour for spectacular display graphics. It all helps our professional customers go 'Beyond the Ordinary' in printing and document management.
